Meet the name built on **stainless trust.**

STAINLESS STEEL
TUBES AND PIPES

JINDAL SAW LTD.
TOTAL PIPE SOLUTIONS

JINDAL QUALITY TUBULAR LTD.
TOTAL PIPE SOLUTIONS

A legacy **written with your trust.**

The Beginning - O.P. Jindal Group

In a short span of three decades, the O.P. Jindal Group has grown from a single-unit steel plant in Hissar, Haryana, India, to a multi-billion dollar, multi-location and multi-product steel conglomerate.

Founded in 1952 by Shri O. P. Jindal, a first-generation entrepreneur, the group today is a leading steel producer with interests spanning across the spectrum from mining iron ore to manufacturing value-added steel products. Ranked fourth amongst the top Indian business houses in terms of assets, the Group today is a US $18 billion conglomerate, spread over multiple plants at various strategic locations in India and many facilities across the globe. Major group companies include Jindal SAW Ltd., JSW Steel Ltd., Jindal Steel & Power Ltd. and Jindal Stainless Ltd.

The O.P. Jindal Group has charted out an aggressive growth plan for the coming decades. All the Group companies are well poised to take advantage of the huge opportunities available on an international scale.

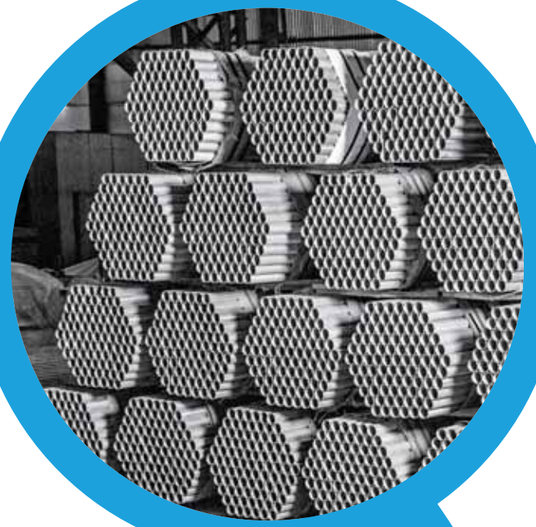
Building Trust - JINDAL SAW LIMITED

Part of the O.P. Jindal Group, Jindal SAW Ltd. started operation in 1984 when it became the first company in India to manufacture Submerged Arc Welded (SAW) Pipes using the internationally acclaimed U-O-E technology.

Jindal SAW manufactures SAW pipes and Spiral pipes for the energy transportation sector; carbon, alloy and Seamless tubes and pipes for industrial applications; and Ductile Iron (DI) pipes for water and wastewater transportation.

Jindal SAW pipes are energy-efficient, reduce dependence on fossil fuels, and help conserve natural resources.

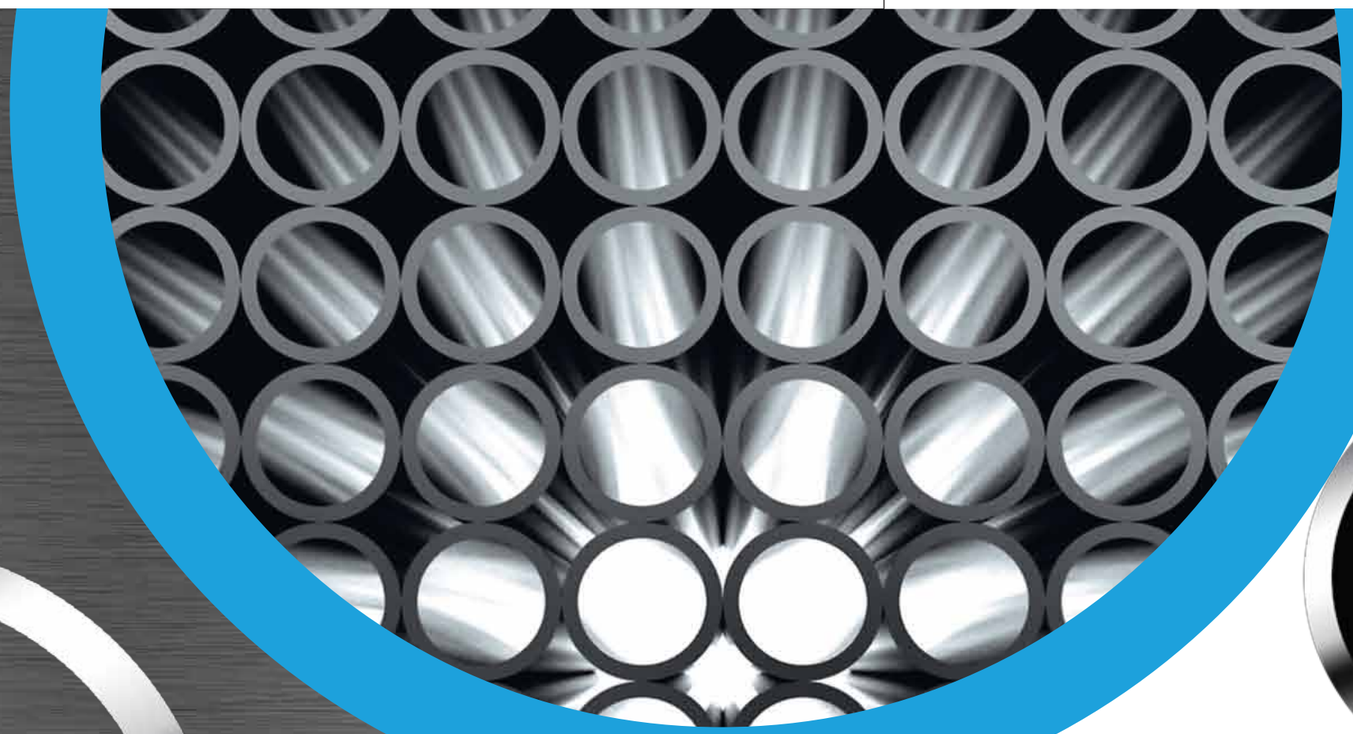
From mining of iron ore to manufacturing value added steel products, Jindal SAW is the undisputed leader in the pipe market. With a track record of stability, trust and growth of over three decades, Jindal SAW has a global presence that sets new benchmarks for the best.



Writing the Future - Jindal Quality Tubular Limited

Jindal Quality Tubular Limited (JQTL) has been set up as the largest manufacturing facility for Stainless Steel tubular products, both welded and seamless, in India. Its strategic manufacturing locations (Gujarat & U.P) are well connected by road and to ports to cater to domestic and global markets. JQTL has adopted the most advanced manufacturing techniques/processes to produce the widest size range of tubes/pipes.

JQTL has an installed capacity of 30000 M.T annually. The highly advanced and sensitive production facilities ensures highest standard of product parameters in terms of accuracy, geometry, length and surface finish. Having implemented sophisticated customer management system, JQTL is focused on providing shorter delivery lead times and post sales customer management. JQTL team is enriched with years of experience and focuses on fulfilling customer's demands flawlessly. The production output is all set to be rolled out from both the locations within first quarter of 2016.



Seamlessly
crafting the best
out of stainless

Types of Material used in Manufacturing Programme

- Austenitic Stainless Steel (Seamless and Welded Tubes and Pipes)
- Duplex Stainless Steel (Seamless and Welded Tubes and Pipes)
- Super Duplex Stainless Steel (Seamless and Welded Tubes and Pipes)
- Martensitic Stainless Steel (Seamless Tubes)
- Super Austenitic Stainless Steel (Seamless and Welded Tubes and Pipes)
- Ferritic Stainless Steel (Welded and Seamless Tubes)
- Super Ferritic Stainless Steel (Welded Tubes)
- Nickel Alloys (Seamless Tubes)

Trust us.
If it's stainless,
we have the best.

Our products are manufactured using state-of-the-art technology.

Our portfolio matches global quality standards.

Product Portfolio

Manufaturing Range				
		Sizes		
Product	**Specifications**	**Diameter**	**Thickness**	**Length**
Welded Stainless Steel Tubes (Heat Exchanger, Condenser & LP / HP Heater U Tubes)	ASTM A 249, A 269, A 688 (U)	12.7 - 102 MM	0.5 - 5 MM	Straight Lenghts upto 30 meters
	EN 10217 - 7 as per ISO Tolerances			
Welded Stainless Steel Pipes	ASTM A 312	1/2" - 36" NB	Sch 5s, 10s, & 40s	Straight Lenghts upto 12 meters
	ASTM A 358, A 778, A 789	8" - 42" NB	3 - 50 MM	Generally produced in 12 metres double Random Length. Can be cut into smaller lengths as per customers requirement.
Stainless Steel Seamless Pipes	ASTM A 312, A 790	1/2" - 12" NB	upto Sch XXS	upto 12 meters double Random Length.
Stainless Steel Seamless Tubes	ASTM A 213, A 789, A 269	6 - 114.3 MM	0.7 - 8 MM	Straight Lenghts upto 30 meters
	EN 10216 - 5 as per ISO Tolerances			
U Tubes	Minimum Radius 1.5D; Maximum 2500 MM			
Hot Induction Bends - Seamless & Welded Pipes	High Frequency Induction Heating	4" - 56" NB	Bend Radius 14" - 420"	

Tubular solutions, **trusted across industries.**

Industry Applications
Nuclear, Thermal and Solar Power Plants
Refinery and Petrochemicals
Oil and Gas
Chemicals and Fertilizers
Process Industries
Defence
Atomic Energy and Aerospace
Pulp and Paper
Automobile
Cryogenic Services
Pharmaceuticals
Railways
Steel Plant and Machinery

What starts as stainless **remains stainless.**

Testing Facilities	
Destructive Testing Facilities	**Non Destructive Testing Facilities**
Our in-house testing laboratory is accredited by NABL	
Physical Testing	Laboratory Spectrometer & Portable Spectrometer
Flattenining Test	Positive Material Identification (PMI) Test
Tension Test	Micro Structure Examination Test / Analysis
Flaring Test	Ferrite Number Test
Flange Test	Online O D Measurements
Reverse Bend Test	Weight Measurement for Chemical Analysis
Transverse Tesnsion Test	Online Eddy Current Test
Transverse Guide Bend Test	Ultrasonic Test for Flaw Detection
Impact Test at Controlled Temperature	Portable U T Tester for Thickness Measurement
	Realtime Radiography Tests
	X- Ray Test - Film Radiography
	Film Reviewer
	Surface Roughness
	Videoscopy
	Microscopes with Pohotograph Facility
	Residual Stress Test
	Hydrotest - Straight Tube/pipe and 'U' Bend Tubes
	Air under Water Test - Straight length up to 30 Meter
	Air under Water Test - for U Bends 15 Meter
Other Tests	
Intercrystalline Corrosion Test in accordance with ASTM A 262 practice, Type A,B & E	
Pitting Corriosion Test in accordance with ASTM A G48A	
Hardness Test	
Die Penetrate Test	
Chloride Contamination Test	
Water Quality Testing Facility	
Acid Bath Analysis Test
